1. Ace Blockchain Crypto Network

(www.abcn.io)

A public blockchain platform with smart contract functionality. Runs consensus algorithm on Proof of stake/ Proof of history/ Proof of Authority. This is proposed to bring in the fastest transactions with lower energy consumption. Like Ethereum, Binance Ace Blockchain Crypto Network can also run a smart contract on its own and the open-source modeling allows developers to create and run unlimited contracts.

2. ABCN coin

(www.abcn.io)

The native coin of Ace Blockchain Crypto Network with perfectly balanced coinomics and can be used openly just like any other crypto. The coin will also be built on Binance Smart chain. ABCN also provides liquidity to the network by using it as fees for transactions, payments, and trading.

3. ABCN Scan Explorer

(www.abcnscan.io)

The dedicated explorer of ABCN coin, just like Etherscan and BSC scan. Track all the transactions of ABCN coins and contracts.

4. Staking Program

(www.abcn.finance)

ABC Network is a staking pool program for ABCN coins. The program believes in Stable income, not high income. With a stable APY and smart contract pool, the staking is a gift to active participants of the project.
